

Eliminar recursividad a izquierdas

$$A \rightarrow Abc \mid Bb \mid Cc$$
$$B \rightarrow Ab \mid Cc$$
$$C \rightarrow cc \mid Aa \mid Bb$$

- Paso 1: ordenar no-terminales:

$$A(A_1), B(A_2), C(A_3)$$

- Paso 2: aplicar el algoritmo

Eliminar recursividad a izquierdas

α β_1 β_2

$$A \rightarrow A\boxed{bc} \mid \boxed{Bb} \mid \boxed{Cc}$$

$$B \rightarrow Ab \mid Cc$$

$$C \rightarrow cc \mid Aa \mid Bb$$

$i=1$ (A) $j=1$ (A) -- eliminar recursividad inmediata de A

$$A \rightarrow BbA' \mid CcA'$$

$$A' \rightarrow bcA' \mid \xi$$
